Student Numbers : 20190808028, 20200808608

Software Requirement :

Management Part:

1. The website allow company employees to log into the system after verifying their information, using the login page of the management section. (Employees or managers can have 2 accounts.(Customer and Management))

a. The website verifies management accounts and passwords and allows company employees to enter the system.

b.If verifications fails the web application returns error messages.

2. The website allows employees and managers to view all travel bookings of customers.

a. The website allows employees and managers to search customers' reservations.

b. The website allows employees and managers to update customers' reservation information.

c. The website allows them to cancel customers' reservations.

3. The website allows employees to view all valid or invalid cars within the company.

a. The website allows employees and managers to view detailed information, comments and rates of cars by clicking on these cars.

b. The website allows them to add new cars, delete cars, invalidate the usage status of the car.

4. The website allows employees and managers and managers to access a map page where they can check the location of the cars.

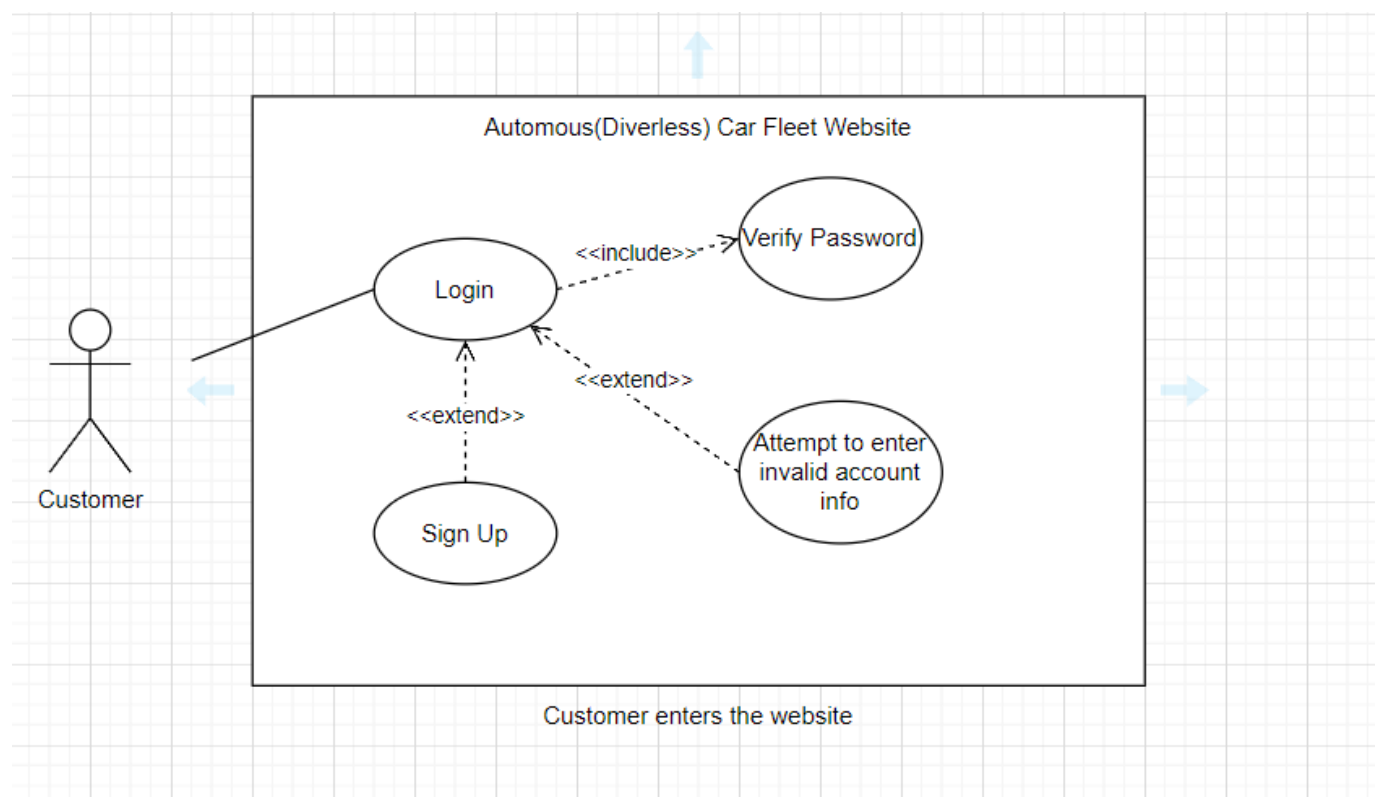

5. The website allows company employees to view and respond to customers' complaints.
6. The website allows only managers to view the personal information of customers.
7. The website allows company employees to view customers' past usage and generate reports.
8. The website allows company employees to view all "for fast cargo" and "for travel" reservations of customers.
 - a. The website allows employees and managers to search customers' reservations.
 - b. The website allows employees to update a reservation, vehicle, and other information on this page.
 - c. The website allows employees to cancel a reservation on this page.

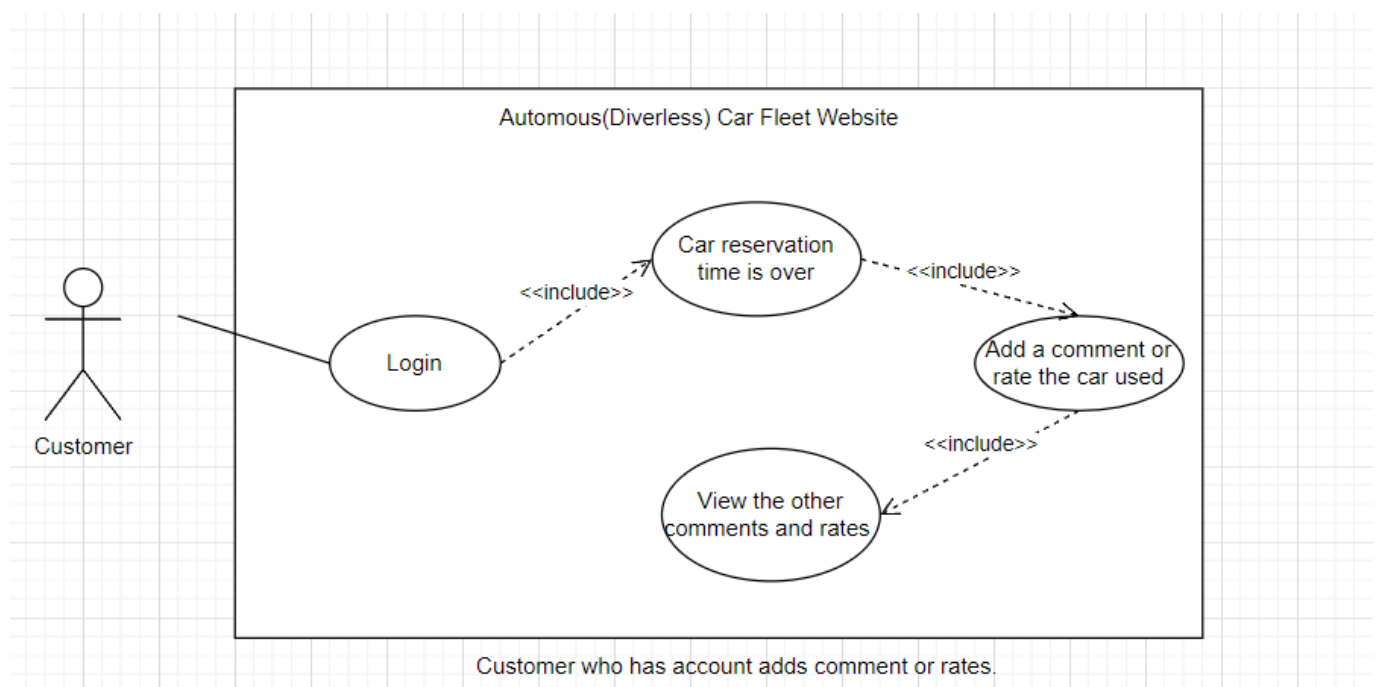

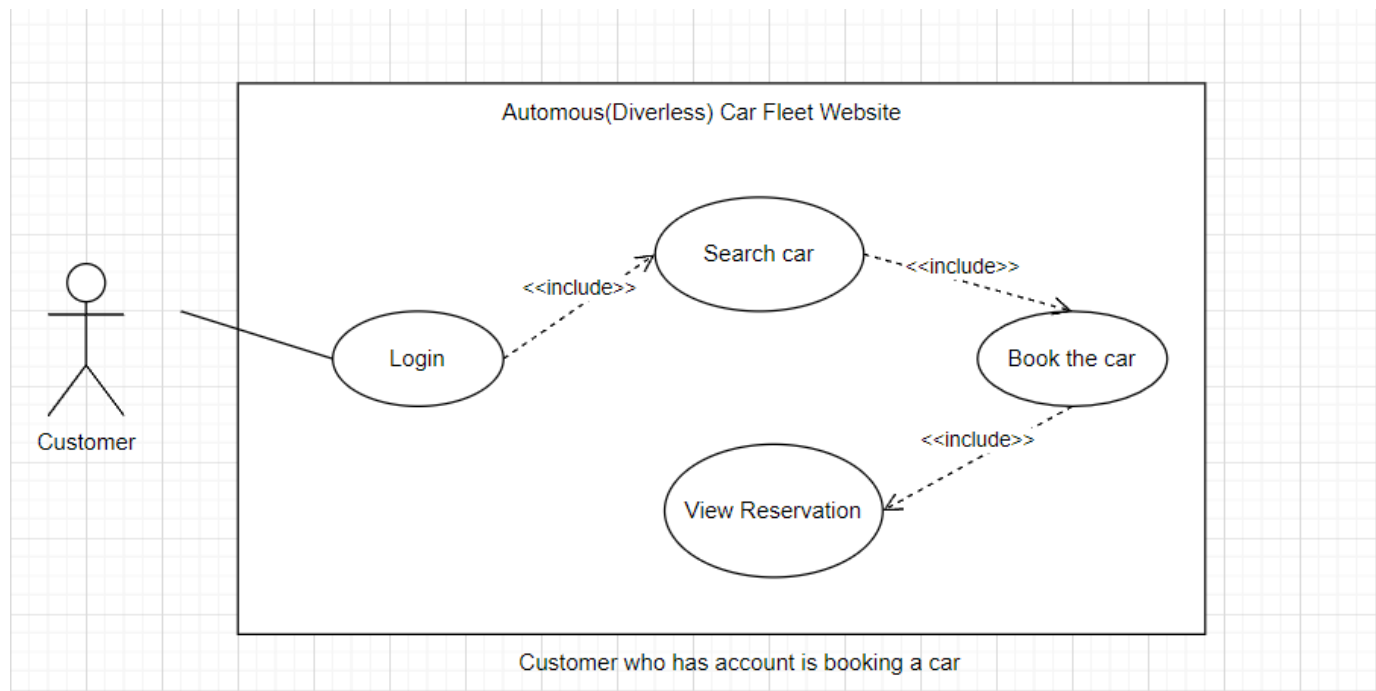

Customer Part:

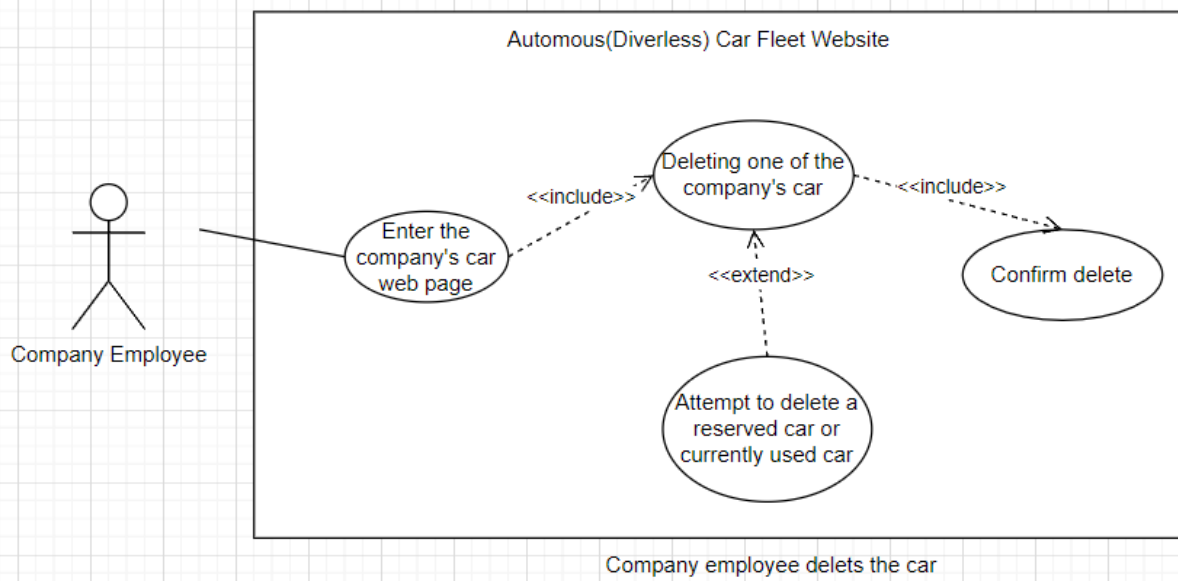

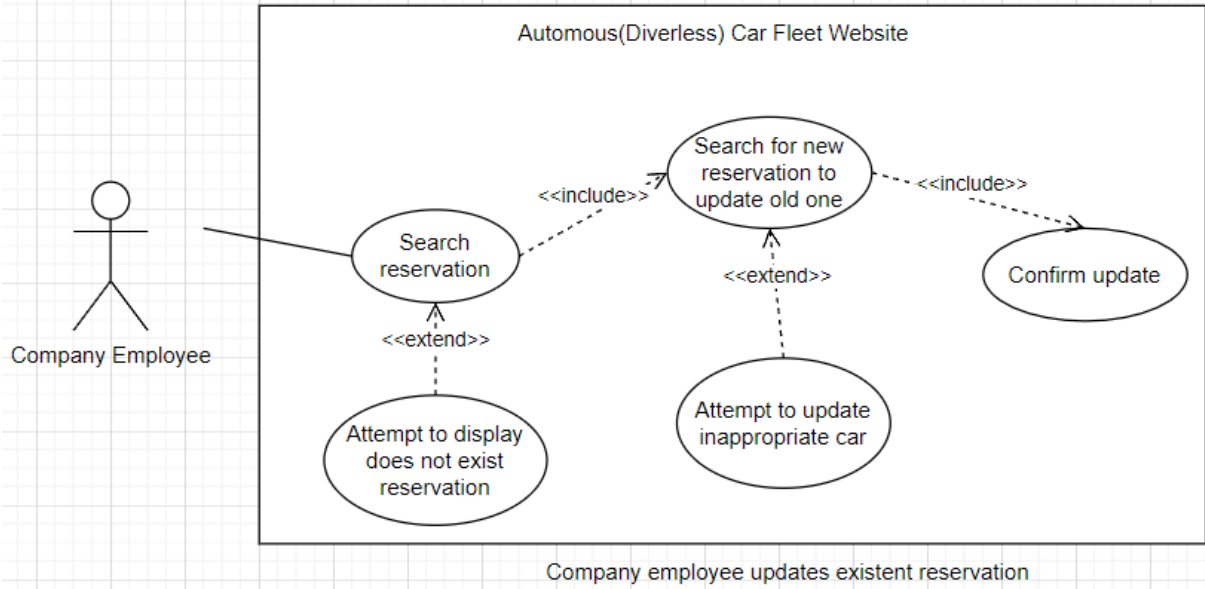

1. The website allows the customer to register or log into the system using the customer section.
2. The website allows customers to log into the system after verifying their information using the login page of the customer section.
 - a. The website verifies customers' accounts and passwords and allows customers to enter the site.
 - b. If the website fails to verify the customers' account and password, it gives an error message and asks them to enter again.
3. The website allows customers to view available vehicles and book "For Travel" or "For Fast Cargo".
 - a. The website allows customers to view detailed information, comments and rates of cars by clicking on these cars.
 - b. The website allows customers to view cars based on the information they have entered.

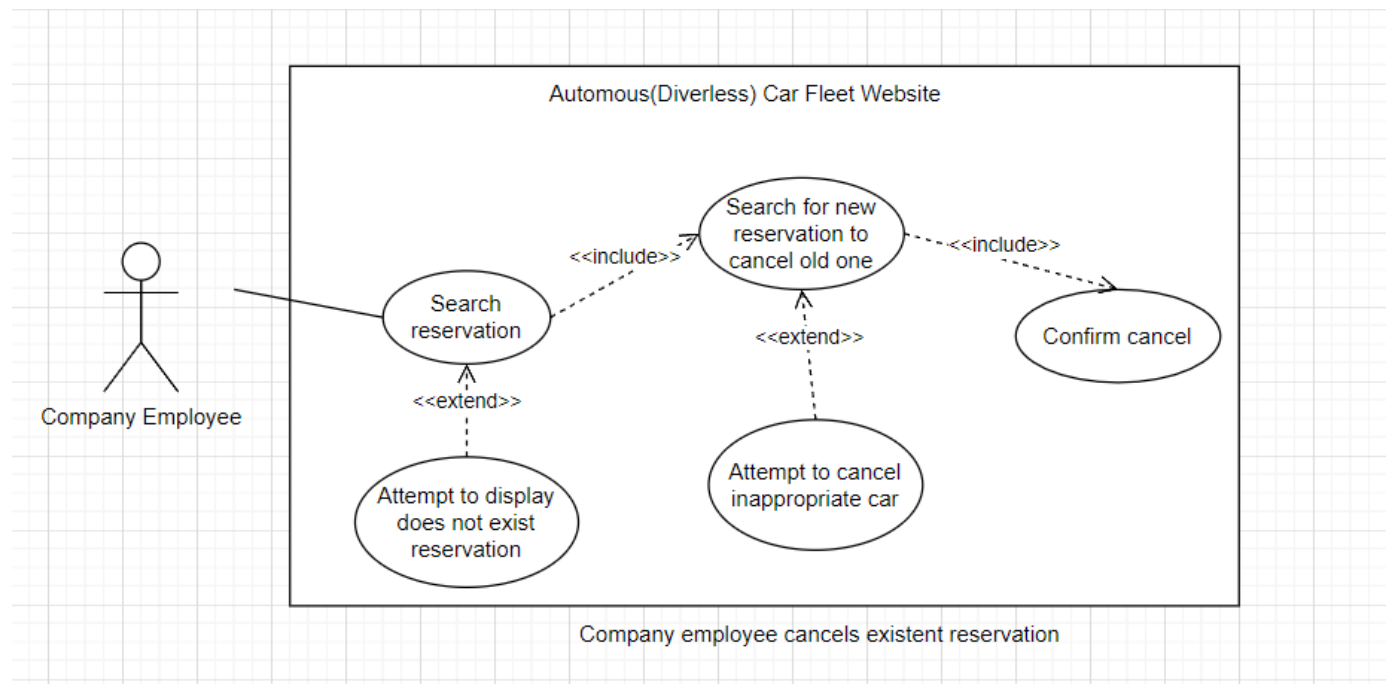

4. The website allows customers to enter the page on which their account information is there.
 - a. The website allows customers to manage payment methods on this page.
 - b. The website allows customers to view and change their personal information on this page.
 - c. The website allows customers to view historical "For travel" and "For fast cargo" information on this page.
 - c.1. The website allows customers to comment and rate their past usage.
5. The website allows customers to view available cars on the map.
6. The website allows customers to connect to customer service on the help page, which allows them to report the problem they are experiencing to the website.
